

Hello!

My name is Eléonore and I am 16 years old. I am French and this year, I have joined Dwight school to start the IB diploma. I chose and I really like Dwight school because of the values it teaches to its students but also because it condenses most of my hobbies and passions: Music (I play piano and guitar), Sport (especially horse riding and ice skating), animals and discovering different cultures and languages. I speak French, English, German and I learn Japanese and Arabic. I am looking for a family to live in London and that is why I turn to you and write this letter with joy.

I have a little brother and a little sister (7 and 10 years) whom I have always taken care of since their birth. I could help you but also your children. I am a good student so I can help them for school and obviously with French!

After this formal presentation, let me present myself as I am really, always in a good mood, smiling and with the will to always bring the joy with me! I am so exciting to have a new adventure in England, to meet you and to create unforgettable memories. It will be an amazing daily exchange and we will have a wonderful relationship! I want to realise my dream with you and your children! I think we could live two excellent years together.

See you soon! ☺
